Design overview

1. Every card (white rectangle) has 20px padding on each side,
2. There is 30px padding around the application,
3. The maximum width of the application views on desktop should be 1130px,
4. The layout changes depending on the screen width:
   1. When the screen width is less than 800px there should be 2 columns on users list page,
   2. When screen size is less than 420px there should be only one column on users list page and the history section on details page should be displayed under the repositories section,
5. The user image has different sizes:
   1. 76px x 76px in users list page,
   2. 120px x 120px in profile section of user details page,
   3. 32px x 32px in history section of user details page,
6. There is no design for the spinner - you can come up with your own.
